About Me

Hello! I'm Sandip Patel. I have completed a B.S.C(it) and i am currently pursuing a Mern-Stack Development course at TopsTechnology. I am passionate about building dynamic and user-friendly web applications, with a keen interest in both front-end and back-end technologies. Feel free to explore my portfolio to see my projects and learn more about my journey!

Experience

Solo Projects

Developed multiple websitetemplates using HTML, CSS, and JavaScript, showcasing proficiency in front-end development. Implemented responsive design principles with Bootstrap to ensure websitetemplates are user-friendly across various devices and screen sizes. Customized WordPress themesand plugins to meet specificclient requirements, enhancing functionality and aesthetics. Worked on back-end integration using Django and PHP, enabling dynamic functionality in web projects. Consistentlyupgraded skills by staying updated withthe latest web development trends and technologies through online courses and self-study. Collaborated with peersand mentors to improve code quality, solvecomplex problems, and deliver high-quality web solutions.

1 Weeks Internship in Django

Contributed to Django projects under supervision, gaining practical experience in developing web applications and implementing backend functionalities. Participated in collaborative coding sessions, working alongside experienced developers to understand best practices and industry standards in Django development. Assisted in debugging and troubleshooting issues, honing problem-solving skills and learning to efficiently resolve technical challenges within Django projects. Explored Django's features and capabilities, including its ORM (Object-Relational Mapping) system, template engine, and authentication mechanisms, through hands-on experimentation and guided learning. Received mentorship and feedback, leveraging the expertise of seasoned professionals to improve Django coding proficiency and overall understanding of web application development principles
